

ENVIRONMENTAL POLICY

BJD Crushers acknowledge the importance of supplying goods and services of a consistent and high standard within an environmentally sound framework. The group therefore operates an Environmental Management System, which meets the requirements of ISO 14001:2018 standards, covering all activities undertaken by the company.

It is BJD policy to:

Assess, control and where possible reduce the impact or potential impact of our activities on the local and general environment in co-operation with the appropriate regulatory authorities.

Continually improve our environmental performance.

Set achievable objectives and targets, informing our employees of these and to make them available to interested parties upon request.

Reduce our consumption of resources (materials, fuel and energy) and our production of waste and emissions'.

Ensure waste is, where possible re-used, re-cycled or disposed of in an environmentally responsible manner.

Ensure our management systems are able to detect and where possible prevent pollution through accidental emissions or effluent discharges.

Reduce the environmental effects of material sourcing by assessing the environmental performance of our suppliers.

Maintain systems, including regular audits to detect deviations from stated policy, objectives or targets and to ensure a response with the appropriate corrective action, to ensure continual improvement.

Ensure that all employees and sub-contractors working on our site act in accordance with this policy and BJD Crushers Environmental Management System.

Develop and sustain environmental awareness of our employee through a comprehensive induction programme and ongoing communications.

Comply with relevant environmental legislation and law.

Signed:
Mr C. M. Ridgway OBE DL
Chief Executive Officer
